

NAIKU CASE STUDY

CASE STUDY: ENLARGED CITY SCHOOL DISTRICT OF MIDDLETOWN, HELPING ALL STUDENTS REACH FULL POTENTIAL

The Enlarged City School District of Middletown is a public school district located in Middletown, NY. The district serves approximately 7,400 students from the city of Middletown and surrounding areas.

Data-driven Personalized Learning Instruction

Middletown has a stated mission to enable all students to graduate, to reach their full potential, to become life-long learners, and to be competitive, productive members of society. An important aspect of achieving this is Middletown's success as a nationally recognized leader in personalized learning instruction; supporting students where they are and helping them to achieve their full potential.

District-wide Assessments with Naiku

Middletown uses Naiku to administer district quarterly benchmark assessments four times a year in the core subjects of ELA, Math, Science, Social Studies, and World Languages. These benchmark assessments provide student performance data to teachers and administrative staff to guide instruction and support personalized learning.

Prior to using Naiku, Middletown printed testing booklets and students filled out bubble sheets. After test completion, teachers would send the bubble sheets to the district tech department for scanning and uploading of data. Teachers would then wait for print-based reports to be emailed to them to view student scores.

Using Naiku, teachers receive student and class performance data instantly upon test completion. The data is available in multiple live, standards-based reports so teachers can quickly view student and class proficiency. Plus, the data is easily shared among teacher teams to facilitate grade level learning strategy meetings. Data is also automatically compiled in class and student longitudinal reports as well, helping teachers view student progress and growth over time. All data is rolled up to the administrative level too.

Middletown started using Naiku at the HS level in 2017-2018, and expanded across K-12 for 2018-2019. Students have taken over 110,000 assessments using Naiku. "Use of Naiku has saved our staff a lot of time and provided teachers more, and faster, insight into student proficiency"
