

FOR IMMEDIATE RELEASE

Naiku announces integration with Google Classroom

Educators benefit from syncing of assessment software and Google education platform

(Bloomington, MN) March 6, 2017 – Naiku, a learner-centric assessment software solution, announced today integration with Google Classroom, providing teachers the ability to sync their classes and students between Google Classroom and Naiku for ease of setup and workflow.

Workflow is simplified for teachers and students through single sign-on; once logged into Google, school users do not need to enter login information separately to Naiku. Also, by using Google Classroom's Share button, teachers can quickly post Naiku assessments to their classes for their students to view and take directly. "We recognize that many schools use Google Classroom as a learning management and communication tool for teachers and students. With this integration, schools and teachers using Naiku assessment are now able to streamline their workflow with Google Classroom " says Greg Wright, CEO of Naiku.

Account setup is simplified as well. Teachers, through the sync, can automatically setup their classes in Naiku to match what they have in Google Classroom. This complements the existing capability of Naiku syncing with most SIS platforms to setup teacher and student accounts and class rosters.

[Naiku's cloud-based software](#) is used by schools and districts to quickly measure and track each student's proficiency of standards in any subject and grade, and is used by individual teachers to help [inform instruction](#), teams of teachers with [common assessments](#), and across districts with benchmark assessments using the included [Item and Assessment bank](#) or by creating or importing their own items and tests. In addition to providing data for informed instruction, Naiku's learner-centric assessment uses metacognitive tools such as confidence, justification/journaling, reflection and adaptive learning resources to engage students and personalize learning to help accelerate student achievement.
